Stud owner agrees to:

1. Take good care of bitch while in our care.
2. Sign litter registrations once litter is born and payment is received.

3. Provide a repeat stud service to the same dog if only one or no live puppies at birth result from the first breeding. There will only be one repeat breeding. If this stud is no longer available for breeding, AI or a different stud can be agreed upon if available.
4. Care for the bitch as if she was one of our own dogs. All females in heat are boarded at our veterinary clinic and have daily play dates in our yard there. Any special needs will be met if possible.

Bitch owner agrees to:

1. Pay stud fees before any breeding takes place, unless a puppy is being considered.
2. Pay an additional \$100 per trip to the airport needed as well as flight cost.
3. Pay for any veterinary services needed while the bitch is in our care. This may include health certificates, progesterone testing, brucellosis testing, vaginal swabs, or AI. The owner will be informed of all charges needed if possible before they are performed.
4. Pay for boarding \$12/day if staying with us.
5. Send bitch in season and healthy enough to be bred.
6. Have a puppy contract that requires all puppies are returned to breeder if owner chooses not to keep puppy. No puppies produced by this mating should ever end up in foster care or a shelter.
7. Contract must require all puppies have appropriate health testing (hips, elbows, eyes) before any breeding takes place.

Attach all registration papers and health clearances
